

Dear Parent/Carer,

Stoke-on-Trent Mathematics Excellence Partnership is organising a Stoke Timestables Competition for pupils in year 4 as part of their commitment to improving maths outcomes and promoting maths across the city.

The Stoke Timestables Rockstars 'Top of the Rocks' Competition will take place in November.

The Stoke Mathematics Excellence Partnership team are on a mission to find the most dedicated TTRS school, class and pupils across the whole of Stoke- on-Trent. Do you think St. George and St. Martin's has what it takes?

For one week only, students from Year 4 across the city will compete against each other by answering as many questions as possible online via the Timestables Rockstars platform - play.ttrockstars.com.

The competition starts on Wednesday 11th November at 9am and runs through to Tuesday 17th November at 3pm with points only counting between 7am and 7pm within this time.

All game modes (Gig, Garage, Studio, etc.) will count, so your child just needs to log in and play in any area to compete! For every correct answer to a multiplication or division question, your child will earn themselves and their school a point.

The Times Tables Rock Stars platform will calculate the school average (the number of correct answers per pupil in the school who play during the competition hours). Winning schools will be the ones with the highest average.

Points mean prizes! The top 3 schools, 5 classes and 10 pupils will receive prizes

To ensure success we need your help. Please encourage and support your child to take part in the competition. Good luck and remember to keep ROCKin'!

Yours sincerely
